ETELÄ-SUOMEN MAAKUNTIEN LIITTOUMA
InnoELLI-Senior -ohjelma 2006-2007

- **Caring TV** as a concept has been developed based on Action research in three various R&D - projects:

Coping at Home I and II funded by TEKES/
FinnWell Programme and

To Home funded by EU/ Inno Elli Senior
Programme

which aim to find new solutions for elderly people living at home and for municipalities dealing with current problems in health and social services

Caring TV

- Is a two channel interactive TV-system through which guidance and support services are given as various participative programmes to improve and promote the capacities of elderly people living at home
- Developed by Laurea, Espoo City and TDC Song & Videra Oy

Caring-TV

Interactive, participative TV for Health care
& Welfare services

The aim of the project **Safe Home-Service design** is:

- To develop a new kind of welfare service production where higher education -, public -, private - and the third sector organizations are involved

to improve and enhance the possibilities of elderly people suffering from dementia to live at home and

to improve and enhance the possibilities of disabled people to live at home

To develop a new kind of business model
